SYNTHETIC DEMONSTRATION CONTENT - NOT FOR PUBLICATION

PREVIEW DOCUMENT

How to Incorporate Children into Labor Supply Equations? An Equivalence-Scale Approach

Authors: Olivier Donni and Anderson Vil

Series and version	PSE Working Paper No. 2025-40 | supplied version September 4, 2026
Document type	Synthetic paper preview
Publication	Blocked
Replacement	Approved canonical manuscript PDF

Purpose of this file

Test the paper-download route without copying or publishing the supplied provisional manuscript.

Preview overview

The preview page describes a framework that represents children's time and monetary channels directly in labor-supply equations.

What is not included

No manuscript text, editorial-status claim, result table, figure, appendix, data, or replication material is included in this demonstration file.

Technical flags: synthetic: true | placeholder: true | publicationStatus: blocked
Replacement required before production. See data/preview_inventory.toml in the site repository.
